

BAGGING MACHINE ARK01

Multi-product semi-automatic bagging machine

Semi-automatic bagging machine equipped with programmable precision scale.

It can be used for quick bagging of aggregates, gravel, sand, slag, pellets, briquettes, feed, rubber, asphalt, bulk materials, granular materials and many others.

The operator place the lot empty under the bag block is the bagging machine fills it quickly and with the maximum precision thank you to the system automatic weighing.

The extraction of the product from hopper happens through a tape conveyor driven by motor-reducer.

Wide mouth hopper for easy filling with a mechanical shovel or other system.

Side and rear couplings for forklift forks in order to simplify the transport.

I'm available others models to cochlea and / or for BIG-BAG.

FEATURES:

- Capacity of bagging 3-4 tons / hour
- Capacity hopper 2 m³
- Measures footprint L 210cm x L 260cm x H. 225cm
- Support base on four legs with dimension of 160cm x 190cm with inserts for the shift with forklift.
- Weighing of precision +/- 100 grams
- System of closing gods bags automatic to hot
- Adjustment in continuous
- Supply three phase 400V, others voltages on request
- Manual of instructions
- CE declaration

SPECIFICATIONS:

- Weight scale of precision
- System of dispensing to tape
- Display digital
- Painting electric
- Cable of connection

ACCESSORIES:

- Heat sealer bags to hot
- Stapler to hot
- Vibrator under hopper
- Mixer inside the hopper
